

The McCormick Header is designed especially for the man who desires a machine to cut large areas of grain, it being built for the exacting and practical farmer who demands a machine of extreme durability, a machine that is easily operated and in which he can place absolute dependence. In addition to this the McCormick Header operates with a minimum amount of power, a feature not to be slighted.

MCCORMICK

The McCormick Binder is simple, dependable, light draft and easy to operate. These three things determine the efficiency of a binder. The designers of this binder have always had these in view and the result is that the McCormick Binder is today a model of perfection. It is simple because all complicated and unnecessary parts have been eliminated and the entire mechanical operation brought down to a practical basis.

HORSES WANTED

We have taken a contract to furnish some horses for foreign shipments and will have a government inspector here, the date of which we will announce later. There are two classes of horses to be bought, one kind is for light cavalry and are to be 15 to 16 hands high with no weight specifications, 5 to 12 years old. Unbroken horses will have to be ridden two or three saddles or wire cuts that do not injure the animal's movements will not be counted against the animal. The light artillery stock is to be 15-1 to 16-2 in height and weigh from 1050 to 1250 pounds, 5 to 12 years old, broke to work, otherwise to be the same conditions as the cavalry horses. Will take mares the same as geldings. Any one having such stock they wish to dispose of should see or call up Johnny Moore or Frank M. King of the Arizona Live Stock Commission Company, 22 West Jefferson street. Phone 546. 1t
